

Solid press on tires

Intella offers a complete range of Press-On Band tire sizes to give you the right solution for every material handling application. Our tires are constructed with a natural rubber compound adhered to a steel band. The tread is highly resistant to wear, with high load bearing capacity and low rolling resistance. Our press-on band tires are available in smooth, semiaggressive tread and in black and nonmarking compounds.

Semi-Aggressive Traction

Smooth

DESIGN

- Designed with high performance, natural rubber compounds

ENDURANCE

- Engineered to be chunk and tear resistant to ensure excellent wear and maximum tire life
- Reinforced sidewall to protect against sidewall impacts and protect the wheel

ENERGY EFFICIENCY

- Low rolling resistance for reduced fuel and energy consumption
- High resilience and low heat build-up

PERFORMANCE

- Enhanced traction for better maneuverability
- Extremely stable and smooth ride
- Greater footprint reduces contact pressure, offering enhanced load distribution

Black smooth

Black traction

Non marking smooth

Non marking smooth
